DETAILED ACTION

Applicant's preliminary amendment directed the cancellation of claims 1-265 and the addition of claims 266-327. As filed, the application only included claims 1-144. Accordingly, newly submitted claims 266-327 have been renumbered 145-206 for examination purposes.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 145-203, drawn to a method of determining an electrode location, classified in class 600, subclass 374.
- II. Claims 204-206, drawn to a method of pacing, classified in class 607, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
